TO OUR CUSTOMERS AND FRIENDS:

We wish to express our appreciation for your splendid patronage in keeping with us during the past trying year. We have tried our best to give you the best in products and service; in spite of the scarcity of labor and the trying frost and freezes the past spring; to the prolonged drought of mid-July to mid-September; we have tried to comply with your high standards of quality. We also feel sure, however, that you would not expect us to replace plants whose failure to grow was caused by the above conditions mentioned.

We especially thank all of you who have recommended and will recommend our plants to your friends and neighbors. We are very grateful. We will continue to do our best to please them as we have pleased you.

In presenting this, our 1948 Spring and Fall Catalogue, we are offering a few Special Collections; and we would be glad to hear, how you like them! You will also notice that we have listed our perennials in groups of three or more of one kind; as this tends to give a more effective garden display.

Visitors are always welcome. Our Gardens are located at Fremont, Nebraska, on East Military Avenue; one-half mile East of City limits; the first house East of Garden City School on South side of the highway. Come often and enjoy our flowers. It is always a pleasure to show them. All stock is State Inspected. Cut flowers sold in season.

Terms—Please note, that Cash must accompany all orders from parties unknown to us. Remittance may be made either by stamps; postal or express money orders; bank drafts; registered letter for cash; or personal check. On orders amounting to less than \$1.50, kindly add 25c to cover postage and packing charges. All orders \$1.50 and over, we prepay all charges. We will ship by parcel post, unless otherwise desired. However, if express shipment is received in bad condition, file claim with your Express Agent. No C. O. D. Orders Considered.

Guarantee—We do guarantee safe arrival of plants in good condition; but due to the fact that we have no control over the plants after they leave our hands, we cannot therefore guarantee them to grow. No claims for errors allowed unless made within ten days after receipt of goods. We express or imply no warranty as to productiveness of nursery stock we sell. If any nursery stock, etc. proves untrue to description under which it is sold, we hold ourselves in readiness on proper proof, to replace all such nursery stock, etc.; but we shall in no case be liable for any sum greater than the amount originally received for said nursery stock.

Flowers depend a great deal on the composition of soils. A good gardener is not surprised if plants vary somewhat in shades of color from descriptions in a catalogue.

We accept all orders subject to crop conditions and on condition that same shall be void should injury befall our stock from hail, fire, frost, error in count, or other causes beyond our control. We appreciate all orders; we give all orders, large or small, the same careful consideration in plants and packing.

Time of Shipment—Regardless of when your order's received plants will be shipped at the proper planting time. Some varieties are best transplanted at a certain time of the year; and we reserve the right to hold shipment of that part of your order 'til the proper planting season.

We have two and one half acres in Perennials and 125 sq. ft. of glass, composed of two small cool green-houses attached to our residence; which makes ideal conditions for the propagation of Chrysanthemums, Buddleias; Carnations; etc.

Perennials—Platte Valley Grown

HARDY EARLY BLOOMING CHRYSANTHEMUMS

This year we are eliminating many varieties; that for one reason or another are not satisfactory. We have also added a few new varieties that have proven winter hardy, early and frost resistant. All plants we send out in the spring are from 2½" pots; which make large flowering clumps by fall.

Select a rich, well drained soil—a sunny location. Don't plant in the shade, as plants will grow too tall and bloom weeks later. Mums love lots of fresh air. They are also great feeders.

Be sure to divide your old clumps the following spring; or plant new potted ones. Give ample room for proper growth and for cultivation; spacing 18 in. to 2 ft. apart in the rows.

Water well, and do not allow to dry out, cultivate ground before it is allowed to dry out. After August 20, cease cultivation so that the side shoots that make plants for next year can begin to form.

Don't cut the flowers for bouquets; but break them off, and they will absorb a greater amount of water; and don't kill them with kindness.

Don't cut the tops off until the next spring, as they help catch snow for winter protection; after ground freezes hard, mulch lightly with oat straw.

We strongly advise the purchase of chrysanthemums in quantities of 3 or more of one kind, since a group of 3 or more plants makes a much more striking and effective color mass in the garden.

HEMEROCALLIS (DAYLILY)

The Hybridizers have wrought wonders with the old-fashioned Daylily. The improvements include a wider color-range, an extended period of bloom, larger flowers, and sturdier plants. Hemerocallis are extremely hardy and will thrive under most ordinary conditions, blooming in full sun or partial shade. Their vigor is especially evident in dry seasons and insect pests have little effect on them. Plant three to four inches deep.
